## PROJECTS

---

### ImmiForms - CRM System

01/2023 – 01/2024

*A customer relationship management system*

- Designed and developed a CRM for managing client data and automation workflows
- Included advanced search, lead tracking, and document management modules

### Prefex AI - Image Animation & Gallery

01/2023 – 01/2024

*A platform focused on image animation and gallery functions*

- Contributed to an AI-powered platform for image animation and gallery creation
- Implemented user-friendly interfaces and image processing logic

### StreetBuzz - News Website

01/2022 – 01/2023

*A news website to manage and publish articles dynamically*

- Built a dynamic content management system for a modern news portal
- Handled user roles, article publishing, and responsive design integration

### Mppl.life - E-Commerce

04/2024 – 05/2024

**Laravel Web Developer (E-Commerce + CRM Platform)**

- **Developed and maintained** an **e-commerce and CRM web application (mppl.life  )** using the **Laravel** framework, integrating both **user** and **admin** login systems with role-based access control.
- **Implemented secure authentication and authorisation** using Laravel's built-in Auth system and middleware for separate **user** and **admin** dashboards.
- **Designed and developed** core e-commerce modules, including product management, order processing, gallery showcase, and CMS pages, using Laravel **MVC architecture**.

- **Built an Admin CRM panel** for managing products, users, orders, policies, and content pages with CRUD operations via **Eloquent ORM**.
- **Created a user dashboard** for browsing products, viewing orders, updating profiles, and interacting with the gallery feature.
- **Integrated MySQL database** with optimised queries and relational models to manage large-scale product and user data efficiently.
- **Developed responsive UI** with Blade templates, Bootstrap, and JavaScript to ensure compatibility across devices.
- **Ensured application security** with CSRF protection, input validation, and password hashing.
- **Optimised performance** through database indexing, caching, and asset minification, reducing load times significantly.
- I successfully deployed and maintained the application in a live environment, ensuring minimal downtime.

**Tech Stack:** Laravel, PHP, MySQL, Blade, Bootstrap, JavaScript, HTML5, CSS3, Git

**Oaems** [↗](#)

12/2024 – 05/2025

#### **OAEMS – CRM & HR Automation Platform**

- **Face Attendance Management System:** Designed and implemented a biometric-based attendance module using face recognition technology, enabling automated clock-ins/outs, reducing manual errors, and improving workforce tracking efficiency. [oaems.in](#) [↗](#)
- **Proposal & Quotation Systems:** Developed integrated modules to streamline the creation, review, and delivery of professional proposals and quotations, accelerating client response time and standardising templates for consistency and branding.
- **Appointment & Relieving Letter Generators:** Built tools to automate issuance of HR documents such as appointment letters and relieving certificates. These modules support dynamic data insertion and template-based output, increasing HR productivity and ensuring compliance.
- **Mobile Notification System:** Architected and integrated a real-time mobile notification system to alert employees about attendance updates, HR actions, quotations, and approvals—enhancing communication and system responsiveness.
- **Overall Impact:** Contributed to end-to-end development, integration, and deployment of core CRM/HR capabilities within OAEMS. Enhanced user experience by unifying operational workflows, facilitating automation, and driving efficiency in company payroll, attendance, and workforce management.

## **KEY ACHIEVEMENTS**

---

### **StreetBuzz News Website**

*Built a dynamic content management system for a modern news portal that handles user roles and article publishing*

### **ImmiForms CRM System**

*Designed and developed a CRM for managing client data, which included advanced search and lead tracking functionalities*

### **Prefex AI Image Animation & Gallery**

*Contributed to an AI-powered platform for image animation with user-friendly interfaces*
